California's Unemployment Rate Declines to 5.1 Percent First time CA and US rates equal in more than 15 years Sixth Consecutive Month of Record High Employment

SACRAMENTO – California's unemployment rate was 5.1 percent in September, down from 5.2 percent in August, the state Employment Development Department (EDD) reported today. A year ago, in September 2004, California's unemployment rate was 6.1 percent.

This is the first time since April 1990 that California has had an unemployment rate equal to the nation's (when the state and U.S. rates were 5.4 percent). During the past 15 years, the national unemployment rate had been as much as 2.8 percent lower than that of California. The national unemployment rate increased 0.2 percent last month, which the U.S. Bureau of Labor Statistics attributed, in part, to the impact of Hurricane Katrina.

According to EDD's survey of employers, nonfarm payroll employment in California fell by 23,700 jobs over the month, for a total of 14,807,700.

According to the separate survey of households, the number of Californians holding jobs in September was 16,999,000, a record high for employment for the sixth consecutive month. This was an increase of 41,000 from August, and up 468,000 from the employment total in September of last year.

The number of people unemployed in California was 906,000 – a decline of 27,000 over the month, and down by 164,000 compared with September of last year.

Of the unemployed, 278,400 were laid off, 102,300 left their jobs voluntarily, and the remaining were either new entrants or reentrants into the labor market, or persons who completed temporary jobs.

UNEMPLOYMENT INSURANCE CLAIMS (NOT SEASONALLY ADJUSTED)

In related data, the EDD reported that there were 300,121 people receiving regular unemployment insurance benefits during the September survey week. This compares with 324,564 last month and 358,752 last year. At the same time, new claims for unemployment insurance were 34,705 in September 2005, compared with 33,711 in August and 39,350 in September of last year.

WAGE AND SALARY EMPLOYMENT DETAIL (SEASONALLY ADJUSTED)

EDD's report on payroll employment (wage and salary jobs) in the nonfarm industries of California totaled 14,807,700 in September, a net loss of 23,700 jobs since the August survey. This followed a gain of 39,800 jobs (as revised) in August.

Six of the categories (natural resources and mining; construction; financial activities; professional and business services; educational and health services; and other services) added jobs over the month, gaining 6,300 jobs. The construction industry showed the largest gain, up by 3,300 jobs. Five categories (manufacturing; trade, transportation and utilities; information; leisure and hospitality; and government) reported job declines this month, down 30,000 jobs. Government posted the largest decline over the month, down by 17,000 jobs.

In a year-over-year comparison (September 2004 to September 2005), nonfarm payroll employment in California increased by 226,300 jobs (up 1.6 percent).

Eleven industry divisions (natural resources and mining; construction; manufacturing; trade, transportation and utilities; information; financial activities; professional and business services; educational and health services; leisure and hospitality; other services; and government) posted job gains over the year, adding 226,300 jobs. On both a numerical and percentage basis, construction showed the strongest employment growth, adding 58,600 jobs (a 6.8 percent increase). Professional and business services and leisure and hospitality recorded the next largest gains, adding 41,100 jobs (up 1.9 percent) and 36,200 jobs (up 2.5 percent), respectively.

No industries posted job declines over the year.

WAGE AND SALARY EMPLOYMENT DETAIL (**NOT** SEASONALLY ADJUSTED)

Over the month, **government** recorded the greatest non-seasonally adjusted gain, up by 50,500 jobs. The gains were concentrated in local and state government education, which were up by 54,300 jobs and 5,300 jobs, respectively, reflecting the start of the new school year. **Leisure and hospitality** recorded the greatest non-seasonally adjusted loss, down by 14,200 jobs. The losses were mainly in the arts, entertainment, and recreation sector, which declined by 9,200 jobs.

The **construction** industry reported the largest gain over the year, up 61,600 jobs. The gains were concentrated in the specialty trade contractors sector, which was up by 41,800 jobs. The **professional and business services** industries recorded the second largest gains over the year, adding 40,300 jobs. The gains were concentrated in the administrative and support services sector, which was up 25,500 jobs, and primarily in employment services, which was up by 18,300 jobs. No industries reported decreases over the year.

Seasonally adjusted payroll detail follows:
